PROFESSIONAL SUMMARY

Software engineer with nearly three years of professional experience building internal applications, enterprise integrations, and backend automation using Python, C#, SQL Server, and REST APIs. Delivered solutions for HR, payroll, IT, engineering, and manufacturing teams. M.S. in Computer Science with a concentration in Software Engineering; continuing backend development and personal projects.

TECHNICAL SKILLS

Languages: Python, C#, SQL, Java, JavaScript, HTML/CSS

Frameworks / Data: ASP.NET Core, Flask, REST APIs, Pandas, SQL Server, ETL, Microsoft Power Platform

Platforms / Tools: Git, Azure DevOps, Linux, Windows Server, IIS, Active Directory, PowerShell, Postman, OpenAI API

Currently learning: Go and additional backend development concepts through Boot.dev

PROFESSIONAL EXPERIENCE

Systems Programmer/Analyst - Lancer Worldwide | Aug 2023 - Feb 2026

- Developed and supported internal software, automated business processes, and integrated systems using Python, C#, SQL Server, REST APIs, and Microsoft Power Platform.
- Partnered with IT, HR, Payroll, Operations, and Engineering to translate manual business processes into deployable applications and data integrations.
- Maintained web applications, desktop tools, scheduled automation, and ETL services in Windows Server, IIS, and Linux VM environments.

Python Data Analyst Intern - Lancer Worldwide | May 2023 - Jul 2023

- Built Python tools for employee analytics, compensation calculations, data cleaning, and Excel-based operational reporting.

SELECTED PROFESSIONAL PROJECTS

ADP - Active Directory Automation

Built a scheduled Python integration synchronizing workforce records with Active Directory across multiple international locations, automating account creation, updates, terminations, and ManageEngine tickets.

Badge-Based Workstation Authorization

Developed a pilot C# / ASP.NET Core badge authorization solution using Active Directory groups and a SQL Server registry; built the workstation component, REST API, audit logs, and IIS-hosted service.

Mexico Manufacturing Labor ETL

Developed a scheduled Python/Pandas pipeline retrieving ADP labor data via SFTP, transforming wages, hours, pay codes, and cost centers, and loading results into SQL Server for reporting.

EDUCATION

University of Texas at San Antonio | M.S. Computer Science, Software Engineering concentration | May 2026

University of Texas at San Antonio | B.S. Computer Science | May 2022 | GPA: 3.8

PERSONAL PROJECTS & CONTINUED LEARNING

- **Portfolio website:** Built a responsive, GitHub Pages-hosted personal site with vanilla JavaScript, interactive experience timeline, GitHub-powered project listing, skills interface, and photo gallery.
- **Asteroids:** Completed a Python/Pygame Asteroids-style game as a guided Boot.dev project; source available on GitHub.
- **Azeroth Bots (in progress):** Personal game-bot automation and telemetry project; exploring Go, SQL, and analytics for future development.
- **Boot.dev:** Continuing structured backend development coursework and programming projects.
